

Bio Rebalancing™ Range

Arbré Bio Rebalancing™ – how does it work?

Bio Rebalancing™ is a filtrate of bacterial culture rich in peptides obtained in bio-technology, helping to manage malfunctioning sebaceous glands (those responsible for producing sebum). It is engineered using the same principles as acidophilus bacteria which is commonly found in yoghurt and is reputed to assist in balancing an unbalanced digestive system.

Why use Arbré Bio Rebalancing™?

An unbalanced sebaceous function (leading to excessive dryness or oily skin) is a result of damage over a period of time caused by several factors such as environment, hormones, diet and pollution.

Too many oils on the skin can lead to clogged pores, over-shiny skin and bad break outs, and too little oil on the skin can result in a dry, flat and flaky surface. Bio Rebalancing™ prompts these skincells to react and adapt their metabolism production, performing a 'rebalancing' action on the skin.

What does Arbré Bio Rebalancing™ do?

- ▶ Decreased oil by up to 31% on oily skin
- ▶ Increased oil by up to 20% on dry skin
- ▶ Assists to normalise oil levels on the skin
- ▶ Promotes cell growth
