

# Tregur Liposomes Anti-Ageing Moisturiser

## Tregur Liposomes Anti-Ageing Moisturiser – how does it work?

This exclusive anti-ageing product uses the latest skin technology in liposomes, to deliver actives that promote natural collagen production for the development of a younger looking skin. Liposomes encase a potent mixture of moisturising ingredients supplemented with Aloe Vera, Witch Hazel, Ginseng and Ginko Biloba, whose healing ingredients fight the effects of ageing. The Liposomes then target, stimulate and 'trigger' the release of a natural reaction to promote collagen within the skin. This action also provides a natural protective shield against free radicals and UV radiation.

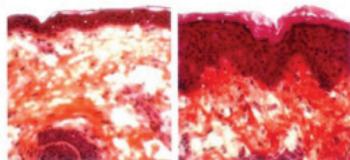

Tregur is a fast acting natural anti-ageing treatment that fights the ageing effect on both young and ageing skin whilst providing a protective shield against radicals.

As we age our skin cells capacity to reproduce is diminished and the collagen III of skin cells also reduces. Liposomes in the Tregur biologically synthesize with your skin to deliver key anti-ageing ingredients deep within the layers of skin.

Arbré unite cutting edge technology with the highest quality natural plant extracts to provide an anti-ageing formula that will leave the skin feeling healthier, younger, softer and firmer.

## What do Arbré Tregur Liposomes do?

- ▶ natural collagen production
- ▶ anti-ageing
- ▶ cleansing
- ▶ toning
- ▶ hydrating

Human epidermis  
before treatment

Human epidermis  
after treatment

Professional Arbré treatments and procedures for Tregur Liposomes are available to beauty therapists only.

Arbré Beauty Programs has a history of more than 30 years in the professional beauty therapy industry.

Over time, Arbré has developed a range of products specifically for the professional beauty therapy industry, with an emphasis on professional treatments.

Arbré was founded in 1983 with the belief that the healing properties of natural ingredients combined with sophisticated technology would result in skincare products of exceptional quality, value and effectiveness.

Today, this philosophy remains true as Arbré incorporates the very best natural qualities the earth and ocean have to offer along with the latest advances in beauty technology.

Arbré is committed to the development of the most comprehensive range of skincare solutions for both the professional and consumer markets. Through constant research and analysis, Arbré continually adjusts and adapts products to suit the markets ever-changing requirements.

Australian owned and operated, Arbré manufactures its products at a state-of-the-art manufacturing facility. Partnering with Arbré means you deal directly with the manufacturer.
