

Vitamin A Crème

Arbre Vitamin A Crème - How does it work?

Vitamin A thickens and stimulates the dermis where your collagen & elastin and blood vessels are, so it reduces wrinkles and increases blood flow to the surface of the skin.

Vitamin A actually increases the deposition of collagen, therefore it slows the normal ageing breakdown of collagen. Vitamin A works by normalising skin functions. This is done through increasing cellular turnover to produce visibly smoother, radiant, firmer and healthier skin, faster.

Why use Arbre Vitamin A Crème?

It has been proven that Vitamin A has the ability to repair cellular functioning as well as combating signs of premature ageing by strengthening the skin. This clever nutrient can communicate with damaged cells to function normally again, often referred to as DNA repair. Vitamin A is essential in the production of enzymes that build your collagen, therefore collagen synthesis will be switched on.

What does Arbre Vitamin A Crème do?

Assists in:

- ▶ Encouraging healthy cell production
- ▶ Reducing fine lines by stimulating collagen production
- ▶ Improving skin texture and boosts skin radiance
- ▶ Neutralising free radicals
- ▶ Improving Acne by decongesting pores
- ▶ Reducing pigmentation.
